

Trusted for everything in Insulation Technology

9001:2015
CERTIFIED COMPANY

▶ ABOUT CABSONS

Incepted in the year 2015, CABSONS INSULATION PRIVATE LIMITED

Cabsons Insulation Pvt. Ltd., established in 2015, is a specialized provider of hot and cold thermal insulation solutions for process industries. Building on the legacy of Shree Krishna Insulators & Engineers (since 1989), we deliver high-performance insulation systems designed to reduce energy loss, enhance process efficiency, and ensure long-term reliability. We offer end-to-end services—from material supply to professional application—using premium, certified insulation materials sourced from trusted manufacturers. Our experienced technical team ensures precise installation aligned with industry standards and client specifications. With a strong service network and proven expertise across chemical, pharmaceutical, food, and engineering sectors, Cabsons continues to deliver cost-effective, durable, and energy-efficient insulation solutions that meet the evolving needs of the market.

OUR CORE SERVICES

HOT INSULATION & COLD INSULATION 01

02 DUAL INSULATION

PUFIN-SITU 03

04 T-FIT INSULATION

FOAM GLASS INSULATION 05

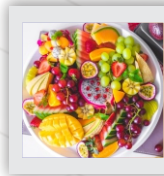

06 ACOUSTIC INSULATION

▶ INDUSTRIES WE SERVE

DAIRY

FOOD

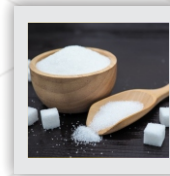

BEVERAGES

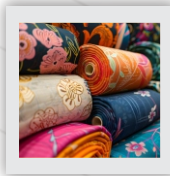

STARCH

SUGAR

TEXTILE

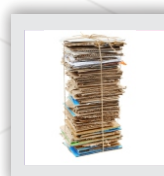

DISTILLERY

OIL & GAS

PULP & PAPER

CHEMICAL

PHARMACEUTICAL

POWER PLANT

► HOT INSULATION

Hot insulation is applied to equipment and pipelines operating at high temperatures to reduce heat loss, improve energy efficiency, and ensure personnel safety. Cabsons insulation specializes in hot insulation for boilers, turbines, furnaces, vessels, and pipelines using high-performance materials like rockwool, glasswool, and ceramic fiber. Our solutions provide thermal stability, durability, and cost savings for a wide range of industries.

► COLD INSULATION

Cold insulation is designed for equipment and pipelines operating at low or sub-zero temperatures. It helps prevent condensation, minimize energy loss, and protect against surface frost. Cabsons Insulation offers solutions using Foam Glass, PUF, and PIR materials, ensuring long-term efficiency and safety in cold storage, food processing, and cryogenic applications.

► PUF IN-SITU

PUF (Polyurethane Foam) insulation is a lightweight, high-performance solution for both hot and cold applications. It offers excellent thermal resistance, moisture protection, and durability. Cabsons Insulation provides PUF slab, pipe section, and in-situ PUF filling services, delivering energy-efficient and cost-effective insulation systems

► FOAM GLASS INSULATION

Foam Glass Insulation is a premium, high-performance thermal insulation material manufactured from recycled glass. Its closed-cell structure provides exceptional durability, moisture resistance, and long-term energy efficiency.

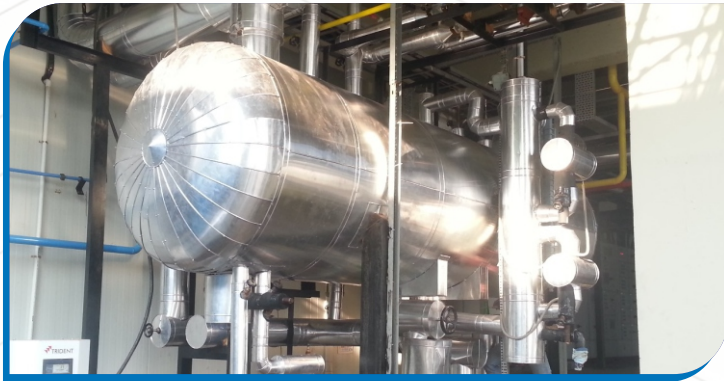

► CHEMICAL INDUSTRIES

► PHARMACEUTICAL INDUSTRIES

► DAIRY AND FOOD INDUSTRIES

▶ T-FIT INSULATION

SINCE NOVEMBER 2025 WE ARE OFFICIAL DISTRIBUTER FOR THE T-FIT INSULATION

T-FIT is a high-performance closed-cell PVDF insulation system designed for critical industries such as pharmaceuticals, food & beverage, biotech, and cleanrooms. With an exceptional temperature range from -80°C up to $+160^{\circ}\text{C}$ (depending on the variant), it delivers superior thermal efficiency, fire safety, chemical resistance, and hygiene standards. Its slim profile and long service life, combined with a modular clamshell design, make T-FIT easy to install, inspect, and maintain—ideal for demanding and contamination-sensitive environments.
